

Use the Create Application Wizard

Introduction

In this lab you will build an interactive application on the data structures you built in the previous lab.

Step 1 – Run the Create App Wizard

1. From SQL Scripts > Results, click **Create App**

Note: If you are back on SQL Scripts, and don't see the "Create App" button perform the following steps:

- Within the Results column, click "1" for the script you just ran.

- Under View Results, click the magnifying glass.

The results page shown above should now be displayed again.

2. In the Create App from Script dialog, click **Create Application**

Create App from Script

Schema

* Schema ?

Script Name **hol**

The following table(s) in this script will be used to default report and form page(s) in the Create Application wizard.

Table Name
HOL_LINKS
HOL_MILESTONES
HOL_PROJECTS
HOL_TASKS
HOL_TEAM MEMBERS

- On the Create an Application page, for Name enter **Quick Projects**. Click **Appearance**. For Theme Style, select **Vita-Slate**. Click **Save Changes**

Name Appearance ?

Pages

Appearance

Theme Style

☐ Vita
 ☐ Vita - Dark
 ☐ Vita - Red
 ☒ Vita - Slate

Navigation

☒ Side Menu
 ☐ Top Menu
 ☐ Mega Menu

Application Icon

☒ Choose New Icon

- For Features, click **Check All**. Click **Create Application**

Interactive Report with Form (h01_links)

Features Check All

- ☒ About Page
Add about this application page
- ☒ Access Control
Enable role-based user authorization
- ☒ Activity Reporting
Include user activity and error reports
- ☒ Configuration Options
Enable or disable application features
- ☒ Feedback
Allow users to provide feedback
- ☒ Theme Style Selection
Update default application look and feel

Settings

Application ID: 646 Schema: ADAM Authentication: Application Express Accounts

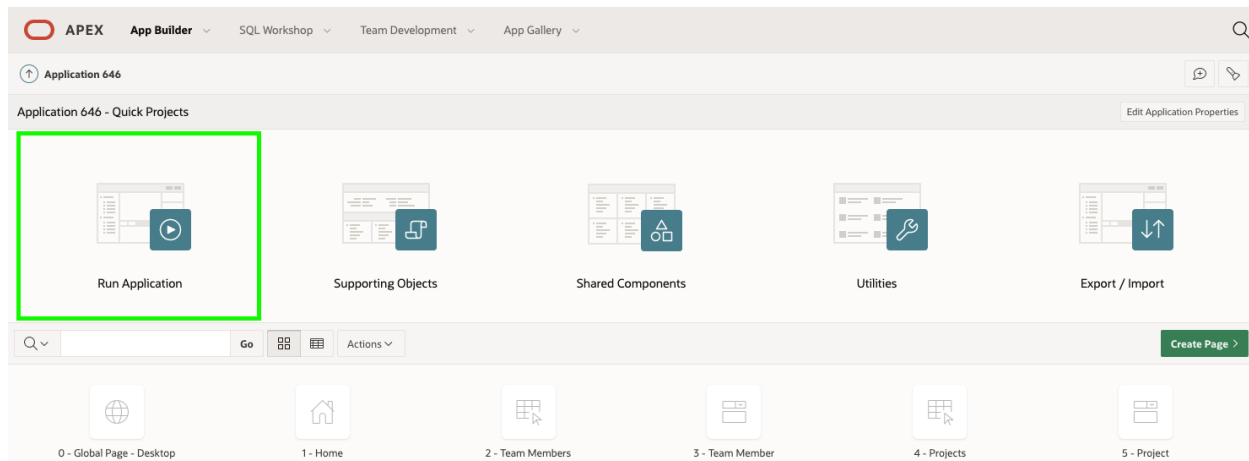

Language: English (en) Advanced Settings User Interface Defaults

Cancel **Create Application**

Step 2 – Run the Application

1. Your new application will be displayed in Page Designer.

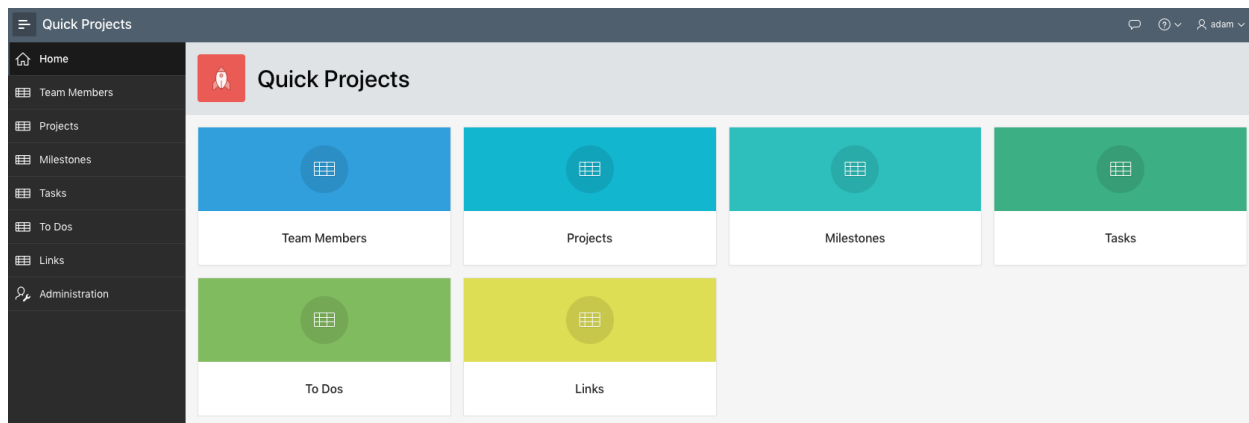

Click **Run Application**.

2. In the runtime environment, the login page will be displayed.

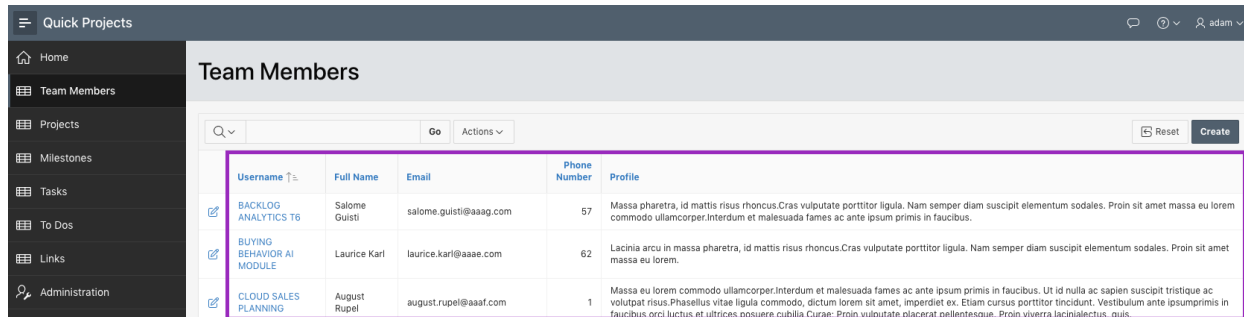

Enter your **Username** and **Password** (Username should be Demo).
Click **Sign In**.

The new application will be displayed.

3. Play around with the application and explore the different pages.

Records are displayed in all of the reports which makes page review significantly easier, especially for reports. The fact that the data may not be exactly correct for the columns is not critical, as you can very easily update the data to make it more realistic.

Username	Full Name	Email	Phone Number	Profile
BACKLOG ANALYTICS T6	Salome Guisti	salome.guisti@aaag.com	57	Massa pharetra, id mattis risus rhoncus.Cras vulputate porttitor ligula. Nam semper diam suscipit elementum sodales. Proin sit amet massa eu lorem commodo ullamcorper.Interdum et malesuada fames ac ante ipsum primis in faucibus.

Summary

You now know how to utilize the Create Application wizard directly from SQL Scripts to create the first cut of your application.
